

HIGH ISLAND, TEXAS

APRIL 13-17, 2008

© 2007

High Island, Texas, has been known for decades as one of the premier spots in the world to observe bird migration. Every spring millions of birds journey north from the American tropics to the forests of eastern North America. Many fly over the Gulf of Mexico, and if they encounter north wind or rain, may put down by the thousands in the isolated groves of live oaks at High Island. Surrounded by hundreds of square miles of coastal marsh and prairie, these tiny woodlands offer much needed food and shelter to the exhausted migrants. A number of these groves have been preserved and are open to birders.

This tour is designed to provide an introduction to the rich avifauna of the Upper Texas Coast. It will focus on bird migration as observed in the coastal groves as well as in nearby fresh water marshes, rice fields, and in the coastal intertidal regions which provide feeding grounds for thousands of shorebirds, hundreds of herons, ibises, and spoonbills, and much more.

Every day at High Island is an exciting one, especially in April when migration reaches its crescendo. If weather conditions are right, you may see ten Scarlet Tanagers in one mulberry tree, 50 Indigo Buntings feeding on the ground, or several species of warblers, thrushes and vireos bathing in one small pond. At times like this, High Island provides some of the most exciting birding to be found anywhere in the world.

For those who would like to spend more time in Texas, this tour can be combined with our Austin, Texas Birding and Nature Festival, April 9-13, 2008.

April 13, Day 1: Arrival in Houston. Participants should arrive at Houston's George Bush Intercontinental Airport (IAH) by 1:00 PM. This airport has four separate terminals and the leaders will begin picking up participants at 2:00 PM outside the "private car" exit of your terminal building located in the baggage claim areas. This is a different doorway than the hotel and shuttle pickup area. Please be absolutely certain that you inform the VENT office of your flight arrival time and the airline. If we do not have your flight information, we will not know to stop at your terminal. We should be on our way to Winnie Texas no later than 3:00 PM.

Keep in mind that we cannot wait more than one hour for persons whose arrival is delayed due to flights that are running late. If you miss being picked up, you will need to take a taxi or limo to our hotel in Winnie which will cost about \$150 for the 1½-2 hour drive. Therefore, if getting to Houston from your home involves tight connections, or if you simply want to arrive the day before to rest up prior to the start of the tour, we suggest you book a room at a Houston airport hotel. There will one designated "pick-up" point to meet the leaders prior to them going to the airport to meet the arriving passengers.

You may also meet the group in Winnie. If you do, please be at the hotel, checked-in, and ready to go birding by 4:30 PM.

NIGHT: Holiday Inn Express, Winnie

April 14-16, Days 2-4: High Island Area. Our activities for the next three days will depend on the weather. Inclement weather on the Texas coast in the spring often means more migrants will stop along the coast, and with luck a "norther" will hit while we are here. The rain and winds associated with such frontal movements can

High Island, Texas; Page 2

cause an impressive fallout of migrants into the coastal groves. If this happens we will alter our plans to take advantage of the spectacle.

The Texas coast is the perfect place to get a feel for migration, and High Island is the best migrant trap on the entire coast. High Island is not an actual island off the coast; the name refers to the fact that it is a slightly raised area near the coast that supports lush groves of larger trees within the vast "sea" of coastal marshlands. On "good" weather days when most migrants fly inland to the forests of East Texas, some birds put down; but during inclement weather the trees may teem with birds, as thousands "fall out" of the sky into the first coastal habitat offering refuge after an exhausting flight into wind or rain out over the Gulf of Mexico. We will check the High Island woods daily and should see many migrants, including Hooded, Black-throated Green, Kentucky, Magnolia, Chestnut-sided, Blue-winged, Tennessee, and Black-and-White warblers.

During low tide we will visit renowned Bolivar Flats, the best shorebirding locale in Texas. At the flats we should see over 50 species of birds, including myriad shorebirds, waders, gulls, and terns. Species to be watched for include American Avocets in spring plumage; American White Pelican; American Oystercatcher; Wilson's, Semipalmated, Piping, and Snowy plovers (there isn't a better place to study small plovers); Red Knot; dowitchers; Whimbrel; Long-billed Curlew; Semipalmated, Western, and Least sandpipers; Marbled Godwit; Herring, Ring-billed, and Laughing gulls; Forster's, Common, Least, Royal, Sandwich, Caspian, and Black terns; and Black Skimmer. Seaside and Sharp-tailed sparrows and rails frequent the nearby marshes. One of the great things about the flats is how very close one can get to the birds. It is an excellent opportunity to study and compare many species of shorebirds at once.

On at least one day during our time here we will visit Anahuac National Wildlife Refuge. Established in 1963, Anahuac is a haven for thousands of marsh animals, among them birds, turtles, and alligators. Anahuac is famous among birders as a good place to observe such notoriously secretive marsh-dwellers as Least and American bitterns, King Rail, Sora, Purple Gallinule, and Marsh Wren. Fulvous Whistling-Duck, White-faced Ibis, and occasionally Glossy Ibis are also seen at Anahuac. This refuge is surrounded by rice fields, and when they are flooded in April the birds swarm into them. Sometimes thousands of shorebirds in glorious spring plumage are present, including such scarce species as Hudsonian Godwit, Buff-breasted Sandpiper, White-rumped and Baird's sandpipers, Wilson's Phalarope, and Stilt Sandpiper.

We will also likely visit the southern edge of the pine/broadleaf forest and bayou country not far north of Winnie where a number of bird species will already be nesting including several warbler species such as Prothonotary, Hooded, Yellow-throated, and Swainson's. Northern Parula, Eastern Bluebirds, and a few hawks and woodpeckers may also be present.

More recently, the Sabine Woods preserve near the Louisiana state-line has become available to birders. This sanctuary, owned and managed by the Texas Ornithological Society, is proving to be as productive as the woods at High Island. Lying farther north and east, sightings of rarer eastern warblers such as Cape May and Blackpoll occur here with greater frequency than other coastal locations. A boardwalk and well-marked trail system allow access to most of this small woodland, while water features continually attract a host of migrant songbirds. Time permitted, we will attempt to visit this place one afternoon.

NIGHTS: Holiday Inn Express, Winnie

April 17, Day 5: High Island to Houston; Departure for Home. We will have the entire morning to bird and will depart for Houston after lunch, arriving Houston's George Bush Intercontinental Airport (IAH) by 2:00 PM. Flights home should not be arranged until after 4:00 PM.

EXTRA ARRANGEMENTS: Should you wish to make arrangements to arrive early or extend your stay, please contact the VENT office at least two months prior to your departure date. We can very easily make hotel arrangements and often at our group rate, if we receive your request with enough advance time.

TOUR SIZE: The tour will be limited to 14 participants.

TOUR LEADERS: Brennan Mulrooney and David Wolf

Brennan Mulrooney was born and raised in San Diego, California. Growing up, his heart and mind were captured by the ocean. He split his summer days between helping out behind the scenes at southern California's leading aquarium and working on sport fishing vessels off the coast. As a wildlife and fisheries biology major at UC Davis, he developed his fascination with birds and love of birding while taking a required ornithology course. Since graduating from UC Davis, Brennan has traveled throughout the United States working on wide-spread ornithological field studies. His work has taken him from the mountains of northern California to the Salton Sea in southern California, and from Cape May, New Jersey to Key Largo, Florida. Currently Brennan and his wife Brynne live in Key Largo where they are conducting research on nesting Roseate Spoonbills in Florida Bay for Audubon's Tavernier Science Center. Participants often comment that Brennan's sharp eyes, sharper wit, and easygoing attitude make it a pleasure to bird with him.

David Wolf is a senior member of the VENT staff and one of our most experienced tour leaders. After birding the U.S. and Mexico for over a decade, an interest in the wildlife of Africa led him to Kenya in 1975 where he spent over a year studying the birds and other wildlife of the African continent. Soon after his return to Texas he began leading Rockport Wildlife Weekends for VENT, at that time a new company, and he hasn't looked back since. In addition to Africa, David has extensive birding and tour-leading experience in North America and the Neotropics. He unites great birding skills with a wide-ranging interest in all aspects of natural history. David and his wife, Mimi, live in Nacogdoches, Texas, with assorted horses, cats, and dogs.

FINANCIAL ARRANGEMENTS: The fee for the tour is **\$1175** per person in double occupancy from Houston. This includes all meals from dinner on Day 1 to lunch on Day 5, accommodations as stated in the itinerary, ground transportation during the tour, gratuities, and guide services provided by the tour leaders. It does not include airfare from your home to Houston and return, airport departure taxes, alcoholic beverages, special gratuities, phone calls, laundry, or items of a personal nature.

The single supplement for this tour is **\$195**. You will be charged a single supplement if you desire single accommodations, or if you prefer to share but have no roommate and we cannot provide one for you.

TOUR REGISTRATION: To register for this tour, please contact the VENT office. The deposit for this tour is **\$300** per person. If you prefer to pay your deposit by check, your tour space will be held for 10 days to allow time for the VENT office to receive your deposit and completed registration form. If you prefer to pay your deposit using a credit card, your deposit must be made with MasterCard or Visa at the time of registration. The VENT registration form should then be completed, signed, and returned to the VENT office. Full payment of the tour fee is due 90 days prior to the tour departure date.

CANCELLATION POLICY: Refunds are made according to the following schedule: If cancellation is made 90 days or more before the tour departure date, the deposit less **\$125** per person is refundable. If cancellation is made between 90 and 70 days before departure date, the deposit is not refundable, but any payments covering the balance of the fee will be refunded. If cancellation is made fewer than 70 days before departure date, no refund is available. This policy and fee schedule also applies to pre-trip and post-trip extensions, as well as any transfers from one tour to another. *We strongly recommend the purchase of trip cancellation insurance to protect yourself.*

If you cancel:

90 days or more before departure date
Between 90 and 70 days before departure

Fewer than 70 days before departure date

Your refund will be:

Your deposit minus \$125.
No refund of the deposit, but any payments on the balance will be refunded.
No refund available.

TRIP CANCELLATION INSURANCE: Application forms for optional coverage for baggage, illness, and trip cancellation can be obtained through the VENT office. We **strongly recommend** that you purchase trip cancellation insurance to protect yourself against losses due to accidents or illness. Check with your insurance agent regarding coverage you may presently have via other insurance policies that may cover illness during your trip. **Waiver for pre-existing conditions are available, however, stipulations apply usually requiring the purchase of the insurance soon after registering. Contact the VENT office prior to registration for details.**

Victor Emanuel Nature Tours is not a participant in the California Travel Consumer Restitution Fund. California law requires certain sellers of travel to have a trust account or bond. This business has a bond issued by Travelers in the amount of \$50,000. CST #2014998-50.

AIR INFORMATION: Victor Emanuel Travel is a full-service travel agency and wholly owned subsidiary of Victor Emanuel Nature Tours (VENT). Victor Emanuel Travel will be happy to make any domestic or international air travel arrangements from your home and return. Please feel free to call the VENT office to confirm your air arrangements.

CLOTHING: Temperatures on the upper Texas coast in April normally involve lows in the 60s and highs in the 80s, with the possibility of even warmer weather. However, a late norther may bring rain and temperatures in the 50s. So, while light field clothing is the norm, you should also bring along a warm sweater or light jacket and raingear. Comfortable walking shoes or boots are essential. If there has been a good bit of rain, the trails can be muddy, in which case you might want to consider bringing along a pair of rubber boots that come up over your ankle. Dress will be informal throughout.

HEALTH: If you are taking prescription medication or over-the-counter medicine, be sure to bring an ample supply that will allow you to get through the tour safely. Please consult your physician as necessary. Remember to pack all medication in your carry-on baggage, preferably in original containers or packaging. As airline baggage restrictions can change without warning, please check with your airline for procedures for packing medication. As standard travel precautions, you should always be up to date with tetanus shots.

MISCELLANEOUS: Chiggers can be a problem in Texas, and insect repellent is strongly recommended (we suggest Cutters or OFF and some people like to use them in combination), as are a hat and sunscreen for protection from the sun. *An alarm clock is essential* and it is also recommended that you bring a refillable water bottle to carry water. The hotel in Winnie does have a coin laundry. On all our Texas tours, we ask participants to please limit their baggage to one medium-sized suitcase and one carry-on bag. Soft luggage such as duffel bags are much preferred, as space for carrying luggage in vans is limited.

A good functioning pair of binoculars will be essential. Your leader will have a spotting scope with them. If you have one and would like to bring it, please feel free to do so. If you are bringing a camera, we suggest that you bring sufficient film or digital storage media as it will not always be readily available during the tour.

The marshy fields at Anahuac NWR harbor the rarely seen Yellow Rail. Refuge personnel regularly offer group walks through a marsh in search of this bird. If any have been seen recently, your tour leaders may decide to offer this activity as an option to the tour group. The chances of seeing this species are usually good. We recommend rubber boots for those who choose to participate in this exciting event.

SUGGESTED READING: Our website, www.ventbird.com offers an affiliated online store that carries a wide variety of items for birding and nature lovers, including over 6,000 books. A portion of the sales from this store benefits the Cornell Lab of Ornithology. You may also visit such other online stores such as www.amazon.com, and for those out-of-print or hard-to-find titles, www.abebooks.com or www.buteobooks.com which specializes in ornithology books.

For use during the tour, we recommend:

TIPPING: Tipping (restaurants, porters, drivers, local guides) is included on VENT tours. However, if you feel one or both of your VENT leaders or any local guides have given you exceptional service, it is entirely appropriate to tip. We emphasize that such tips are not expected and are entirely optional.

RESPONSIBILITY: Victor Emanuel Nature Tours, Inc. (VENT) and/or its Agents act only as agents for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, or airplane and assume no liability for injury, damage, loss, accident, delay, or irregularity which may be occasioned either by reason of defect in any vehicle or for any reason whatsoever, or through the acts or default of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. VENT and its agents can accept no responsibility for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. All such losses or expenses will have to be borne by the passenger, as

High Island, Texas; Page 6

tour rates provide for arrangements only for the time stated. The right is reserved to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. The right is reserved to cancel any tour prior to departure, in which case full refund will constitute full settlement to the passenger. The right is reserved to substitute leaders on any tour. Where this is necessary, notification will be given to tour members. No refund will be made for any unused portion of the tour unless arrangements are made in sufficient time to avoid penalties. The prices of the tours are based on tariffs and exchange rates in effect July 20, 2007 and are subject to adjustment in the event of any change therein. The right is reserved to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely. The airlines concerned and their agents and affiliates are not to be held responsible for any act, omission, or event during the time passengers are not on board their aircraft. The passenger ticket in use by said airlines, when issued, shall constitute the sole contract between the airlines and the purchaser of these tickets and/or passenger. The services of any I.A.T.A.N. carrier may be used for these tours, and transportation within the United States may be provided by any member carrier of the Airline Reporting Corporation.
