

**SOUTHEASTERN BRAZIL PART I:
COASTAL PARANÁ /SANTA CATARINA, RIO GRANDE
DO SUL & ITATIAIA
SEPTEMBER 25 – OCTOBER 9, 2010**

**IGUAÇU FALLS PRE-TRIP
SEPTEMBER 22-26, 2010**

© 2010

South America's largest country is also one of its richest for birds. Nowhere is this more apparent than in southeastern Brazil, where habitats range from coastal rain forest and wet pampas to montane cloud forest and plateau grassland. Long isolated from Amazonia by the dry brushlands of central Brazil (left in the wake of receding glaciers during the last ice age), the avifauna of southeast Brazil has radiated in a myriad of directions. Today there are more than 170 species of endemics that are found nowhere else in the world. This truly is a must destination for birders.

Since it is impossible to encompass all of the diversity of this region of Brazil into a single short tour, participants can combine this tour with our Southeastern Brazil Part II: Espírito Santo's Montane & Lowland Endemics tour (October 7–17, 2010). Either tour can be taken independently as a wonderful, short introduction to the birds of this region, or, taken together for a more comprehensive survey that will maximize the number of endemics seen. The tours are meant to be complementary and although there will be a fair amount of overlap in possible species, the emphasis of Part II will be on the many specialties of Espírito Santo that are more difficult or not possible to see on Part I. More widespread species recorded on Part I will be searched for as time allows, but not at the expense of devoting time to the target species.

On the optional pre-trip to Iguazu, the thunderous cataracts of Iguazu, comprising the world's largest waterfalls, will be the backdrop for some great birding. We will explore lush forests in search of some of Brazil's most spectacular birds, including Black-fronted Piping Guan; Robust and Blond-crested woodpeckers; Red-ruffed Fruitcrow; Spot-billed Toucanet; Toco and Red-breasted toucans; Surucua Trogon; Rufous-capped Motmot; and Plush-crested Jay. Roving mixed-species flocks should provide us with many of the less spectacular but no less special birds such as Black-capped, Ochre-breasted, and White-eyed foliage-gleaners; Southern Antpiper; Southern Bristle-Tyrant; São Paulo Tyrannulet; and Creamy-bellied Gnatcatcher.

Southeast Brazil Part I will commence in Curitiba, which will be our jumping-off spot for exploring the varied Atlantic Forest habitats of Paraná state. The cloud forests of the Serra da Graciosa will provide the backdrop as we search for Solitary Tinamou, Long-trained Nightjar, Canebrake Groundcreeper, White-bearded and Giant antshrikes, Slaty Bristlefront, White-breasted Tapaculo, Hooded Berryeater, Bare-throated Bellbird, Azure-shouldered and Brassy-breasted tanagers, and many more. Nearby grasslands and marshes may yield such specialties as the Sickie-winged Nightjar, Glaucous-blue Grosbeak, and the recently described Wetland Tapaculo. We'll also visit

marshes and restinga woodlands in adjacent Santa Catarina state, in search of the unique and recently described Marsh Antwren, as well as Yellow-legged Tinamou, Ochre-collared Piculet, Pale-browed Treehunter, Spot-backed Antshrike, Squamate Antbird, Unicolored Antwren, Restinga Tyrannulet, the recently rediscovered Kaempfer's Tody-Tyrant, and the spectacular Black-backed and Red-necked tanagers.

Rio Grande do Sul is a different world of strange araucaria forests, high plateau grasslands and marshes, and scenically spectacular canyons. Historically, this region was colonized by successive waves of European immigrants from Germany, Italy and Switzerland. That immigrant influence is reflected in the landscaping, architecture and cuisine of the area, which, combined with the temperate climate and moors-like nature of the high grasslands, lends a decidedly European feel. The birds are equally unique, with such specialties as Plumbeous Rail, Slaty-breasted Wood-Rail, Vinaceous-breasted Parrot, Blue-bellied Parrot, Long-tufted Screech-Owl, Mottled Piculet, Araucaria Tit-Spinetail, Straight-billed Reedhaunter, Black-and-white Monjita, Azure Jay, Chestnut-backed Tanager and Saffron-cowled Blackbird representing just a few of the many highlights that await us in Rio Grande do Sul.

We'll finish this tour with several days at one of our favorite locales in all of South America—lovely Itatiaia National Park. The road up the mountain passes through a lush bromeliad-laden cloud forest and dark tunnels of giant bamboo, where restless flocks of colorful tanagers forage and secretive antbirds skulk. A variety of trails through some of the most beautiful forest anywhere will allow us to sample the avifauna of different elevational zones. Here we may see such gems as the spectacular Black-and-gold Cotinga; Plovercrest; Tawny-browed Owl; Dusky-legged Guan; Large-tailed, Tufted, and Giant antshrikes; Rufous-backed Antvireo; Fork-tailed Tody-Tyrant; Itatiaia Spinetail; Brassy-breasted and Gilt-edged tanager; and many more.

A variety of habitats encompassing some spectacular scenery; a pleasant, largely temperate climate; good food and accommodations throughout; and one of the world's most unique and endangered avifaunas combine to make southeastern Brazil an unforgettable birding experience.

IGUAÇU FALLS PRE-TRIP

SEPTEMBER 22–26, 2010

September 22–23, Days 1-2: Travel to Iguacu Falls. There are direct overnight flights from Los Angeles, Dallas/Ft. Worth, Miami, and other cities which will arrive in São Paulo on September 23. Participants arriving this day will clear customs and connect to our group flight to Iguacu Falls (TAM Flight 3559 which is scheduled to depart at 1:25 p.m. – subject to change).

Participants wanting to avoid the risk of misconnecting should consider arriving in São Paulo on September 22 and spending the night at an airport-area hotel. Alternatively, previous participants have opted to connect through to Iguacu a day in advance of the official start of the tour. The Hotel das Cataratas is an ideal spot to rest up and recover from the overnight international flights, and has great birding and sightseeing opportunities within an easy walk from the front porch. Upon request, VENT will be happy to assist with these arrangements.

Although our late afternoon arrival on September 23 will likely preclude any extended birding, there should be time for a short birding walk to the Iguacu Falls overlook before dark. Here, in addition to the awesome splendor of the world's largest waterfalls, we will be treated to the avian spectacle of thousands of Great Dusky Swifts as they swirl through the mists of the cataracts preparing to roost for the night. This is a particularly good area for

seeing Toco and Red-breasted toucans, Plush-crested Jays, and Green-headed Tanagers, and with luck, we could turn up the rare Black-fronted Piping-Guan.

NIGHT(September 23): Hotel das Cataratas, Iguaçu Falls

September 24–25, Days 3-4: Foz do Iguaçu Area. Through special arrangements with the Brazilian Park Service, we'll visit some of the more remote, less accessible areas of the park where we will seek the larger, more reclusive birds of the area. We will also visit and bird the area surrounding the falls themselves. Among the more spectacular birds that we'll be searching for are the Black-fronted Piping Guan, Red-ruffed Fruitcrow, Spot-billed Toucanet, Toco and Red-breasted toucans, Rufous-capped Motmot, Surucua Trogon, Blond-crested and Robust woodpeckers, and Plush-crested Jay. There is also potential for seeing the extremely rare Helmeted Woodpecker, which will nonetheless require much luck to find. Smaller birds will not be neglected, and indeed, much of our time will be spent searching for the roving mixed-species flocks which may yield numbers of birds such as White-throated and Olivaceous woodcreepers; Black-capped, Ochre-breasted, and White-eyed foliage-gleaners; Swainson's and Three-striped flycatchers; Gray Elaenia; Southern Bristle-Tyrant; São Paulo Tyrannulet; Creamy-bellied Gnatcatcher, Rufous-crowned Greenlet; Blue-naped Chlorophonia; and Green-headed, Black-goggled, and Guira tanagers. As is the case anywhere in tropical forests, there are a number of skulking birds of the forest interior that will require special effort to see, among them Rusty-breasted Nunlet, Short-tailed Antthrush, Russet-crowned Spadebill, Southern Antpipit, and Eastern Slaty-Thrush.

NIGHTS: Hotel das Cataratas, Iguaçu Falls

September 26, Day 5: Iguaçu to Curitiba (or São Paulo for those not continuing on the main tour). We will be transferred to the Iguaçu Falls airport in time for the 7:30 a.m. departure of TAM Flight 3554, which is scheduled to arrive in Curitiba at 8:30 a.m. Participants taking only the Iguaçu Falls Pre-Trip can depart on the flight of their choosing.

SOUTHEASTERN BRAZIL PART I

SEPTEMBER 25 – OCTOBER 09, 2010

September 25–26, Days 1 & 2: Travel to Curitiba; Drive to Itapoá with Birding en route. There are direct overnight flights from Los Angeles, Dallas/Ft.Worth, Miami, and other cities which will arrive in São Paulo on September 26. Participants arriving this day will clear customs and connect to TAM Flight 3333 to Curitiba, which is scheduled to depart at 8:55 a.m. (subject to change). Participants wanting to avoid the risk of misconnecting should consider arriving in São Paulo or Curitiba on September 25 and spending the night. Upon request, VENT will be happy to assist with these arrangements.

We will have lunch in Curitiba prior to driving south to Itapoá. Our exact itinerary on this day will remain somewhat flexible in order to accommodate any changes in air schedules, but we will plan for some birding en route to Itapoá. This will likely include time in the afternoon for a first try at the recently discovered Marsh Antwren. Described in 1998, this antbird was originally placed in the monotypic genus *Stymphalornis*, although recent molecular studies reveal that it belongs in the genus *Formicivora*, with which it seems to share many plumage and vocal similarities. Unique among antbirds is its preference for cattail marshes. If nearby rice fields are flooded, we could also be treated to good numbers of shorebirds.

NIGHT (September 26): Pousada Reserva Volta Velha or Pousada Vila da Gloria, Itapoá

September 27–28, Days 3 & 4: Paraná/Santa Catarina Lowlands. We'll have the better part of two full days to bird the rich coastal lowlands on the border of these two Brazilian states. Much of our time will be spent exploring *restinga* woodland; a unique, stunted forest that grows on the sandy soils near the coast. Our biggest targets here include four of Brazil's most localized endemics: the Unicolored Antwren, the recently rediscovered (and still very poorly known) Kaempfer's Tody-Tyrant, the Restinga Tyrannulet, and the spectacular Black-backed Tanager. The

presence of these four specialties would be reason enough to spend time here, but these woodlands are home to many more species of only slightly wider distribution, including many endemics. Among the many birds that we will be searching for are Yellow-legged Tinamou; Speckled Chachalaca; Plain Parakeet; Saw-billed Hermit; Violet-capped Woodnymph; Spot-billed Toucanet; Blond-crested, White-spotted, and Robust woodpeckers; Lesser and Plain-winged woodcreepers; Black-capped and White-eyed foliage-gleaners; Pale-browed Treehunter; Spot-backed Antshrike; Rufous-winged Antwren; Squamate Antbird; White-breasted Tapaculo; Rufous-tailed and Gray-hooded attilas; Eye-ringed Tody-Tyrant; Fuscous and Gray-hooded flycatchers; Azure Jay; Fawn-breasted, Red-necked, Black-goggled, Rufous-headed, and Azure-shouldered tanagers; and Violaceous and Chestnut-bellied euphonias.

We'll also return to the marshes for more encounters with *Stymphalornis*, as well as for other treats such as Blackish Rail, Spix's Spinetail, Long-billed Wren, and the dazzling Brazilian Tanager.

Late in the afternoon on Day 4, we will drive to Curitiba.

NIGHTS: Pousada Reserva Volta Velha or Pousada Vila da Gloria, Itapoá (September 27); Tulip Inn São Jose dos Pinhais, Curitiba (September 28)

September 29–30, Days 5 & 6: Serra da Graciosa and the Curitiba Region. Our schedule on these days will remain somewhat flexible, in order to take maximum advantage of local weather and birding conditions. On at least one morning we will be birding the highlands of the Serra da Graciosa, a southern extension of the Serra do Mar. Although only 3000 ft. in elevation, the forest here has a decidedly montane feel to it. Our primary target bird is the rare and poorly known Canebrake Groundcreeper, a large furnariid whose exact taxonomic affinities are uncertain. The groundcreeper is only one of many avian prizes to be found in these lush forests. We will also be seeking Spot-winged Wood-Quail; Slaty-breasted Wood-Rail; Scale-throated Hermit; Versicolored Emerald; Brazilian Ruby; Ochre-collared Piculet; Scaled, Lesser, and Olivaceous woodcreepers; Black-billed Scythebill; Rufous-breasted Leaf-tosser; White-browed Foliage-gleaner; Sharp-billed Treehunter; Gray-bellied Spinetail; Giant, Large-tailed, and White-bearded (rare) antshrikes; Dusky-tailed Antbird; Variegated and Speckle-breasted antpittas; Short-tailed Antthrush; Rufous Gnateater; White-breasted Tapaculo; Slaty Bristlefront; Hooded Berryeater; Bare-throated Bellbird; Rufous-tailed Attila; Mottle-cheeked, Greenish, and Gray-capped tyrannulets; Azure Jay; Rufous-crowned Greenlet; Azure-shouldered, Chestnut-backed, Brassy-breasted, and Gilt-edged tanagers; Thick-billed Saltator; Red-rumped and Bay-chested warbling-finches; and Blackish-blue Seedeater.

Weather and conditions on the ground permitting, we will plan to devote an afternoon (probably after birding the Serra da Graciosa in the morning) to a boat excursion to Superagui National Park, which straddles the boundary between the states of Paraná and São Paulo. This park protects a cluster of near shore islands as well as coastal mangrove forests and adjacent lower slopes of the Serra do Mar. Our main objective will be reaching a near shore island where large numbers of endangered Red-tailed Parrots come to roost for the evening. These spectacular parrots have one of the most restricted ranges of any of Brazil's Atlantic Forest endemics, occupying a narrow littoral strip that extends from São Paulo south to northernmost Santa Catarina. Their global population is estimated at less than 5000 birds. Each day, the Red-tailed Parrots commute from their roosting/nesting island to the nearby mainland, where they spend most of the day feeding before commuting back to the island in late afternoon. We will plan to stake out the island just in advance of the time when the parrots return. Along the way we will likely see a variety of waterbirds, including Brown Booby, Magnificent Frigatebird, and various terns, herons, egrets, and shorebirds. With luck, we may find Scarlet Ibis, a spectacular bird that is only now starting to reoccupy much of its historical range in coastal Brazil.

Another option will be visiting the grasslands of Vila Velha State Park (known for its spectacular sandstone formations) and various marshes that are scattered through the area. Here, in addition to a variety of more widespread waterfowl, waders, and grassland birds, we will search for the recently described Wetland Tapaculo (always difficult to actually see), Rufous-capped Antshrike, Sharp-tailed Tyrant, Lesser Grass-Finch, Black-and-rufous Warbling-Finch, Great Pampa-Finch, Glaucous-blue Grosbeak, and others. If conditions are favorable,

we'll plan a nighttime excursion to look for owls and nightjars, with the rare Sickie-winged Nightjar as a particular objective. Other possibilities include Long-trained and Band-winged nightjar, Striped Owl, Rusty-barred Owl, and Long-tufted Screech-Owl. We might also make a return visit to the Serra da Graciosa, depending on whether or not we are still missing any key species from that rich area.

NIGHTS: Tulip Inn São Jose dos Pinhais, Curitiba

October 1, Day 7: Curitiba to Pôrto Alegre & São Francisco de Paula. This morning we'll transfer to the Curitiba airport in time for the 10:00 a.m. departure of TAM Flight 3441 to Pôrto Alegre, an important shipping center of southern Brazil situated at the junction of five rivers (flight subject to change). Upon arrival we'll head to a locally renowned *churrascaria* (Brazilian barbecue) for a great lunch, and then drive north to São Francisco de Paula and the Hotel Veraneio Hampel, located adjacent to a lovely araucaria forest. We should arrive early enough for some late afternoon birding on the grounds, with an opportunity for owling after dinner.

NIGHT: Hotel Veraneio Hampel, São Francisco de Paula

October 2-3, Days 8-9: Aparados da Serra National Park and the São Francisco de Paula Area. We will have two full days to explore this interesting region, which will yield a number of species not seen elsewhere on this tour. On one day we'll leave early to drive north through high plateau grasslands to the Aparados da Serra National Park. These are beautiful rolling grasslands, dotted with small marshes that harbor Yellow-billed Pintail, Plumbeous Rail, Straight-billed Reedhaunter, Spix's Spinetail, Saffron-cowled Blackbird, Yellow-rumped Marshbird, Lesser Grass-Finch, Long-tailed Reed-Finch, and others. The grasslands themselves may yield such species as Spotted Nothura, Red-legged Seriema, Whistling Heron, Maguari Stork, Buff-necked Ibis, Firewood-gatherer, Gray Monjita, Black-and-white Monjita, Hellmayr's Pipit, and Great Pampa-Finch. We will also look for the very localized Long-tailed Cinclodes (a bird described new to science in 1969).

This open grassland contains islands of araucaria forest. Araucarias are a group of ancient conifers restricted to the southern hemisphere, another example being the Norfolk Island pine. One of the largest remaining stands of araucarias is preserved in the Aparados da Serra National Park. Birdlife is limited here, but includes some rare and/or local species such as Vinaceous-breasted Parrot, Mottled Piculet, Striolated and Araucaria tit-spinetails, Azure Jay, and Red-rumped Warbling-Finch. We would be remiss not to mention spectacular Itaimbezinho Canyon, one of the true scenic wonders of Brazil. At various times of the day, impressive squadrons of big Biscutate and Sooty swifts wheel in and out of the deep-cut gorge, lending avian counterpoint to the geologic marvel. Should weather conditions allow (meaning no fog to obscure the view), we will make visiting this spectacular canyon a priority. Yet another objective in this area will be a search for the recently described (2005) Planalto Tapaculo. Our 2006, 2007, and 2009 groups were treated to excellent studies of this species, making us perhaps the first organized tour group to see it since its formal description.

On the other day in this region we'll bird the grounds of the Hampel (which boasts a nice stand of araucaria forest complete with excellent trails) and other areas closer to home. Birds abound here. A variety of hummers buzz about the gardens and we may see Brown Tinamou; Dusky-legged Guan; Long-tufted Screech-Owl; Mottled Piculet; Planalto, Lesser, and White-throated woodcreepers; Araucaria Tit-Spinetail; Olive Spinetail; Buff-browed Foliage-gleaner; Variable Antshrike; Variegated Antpitta; Blue-billed Black-Tyrant; Rough-legged Tyrannulet; Azure Jay; White-rimmed Warbler; Green-chinned Euphonia; and Diademed Tanager among others. We'll pay special attention to the hotel feeders, which regularly produce eye-level views of the stunning Chestnut-backed Tanager. A visit to nearby bamboo-dominated forest on the rim of the escarpment may also yield such prizes as Vinaceous-breasted Parrot, Blue-bellied Parrot, Giant and Large-tailed antshrikes, Dusky-tailed Antbird, Brown-breasted Bamboo-Tyrant, and Chestnut-headed Tanager.

NIGHTS: Hotel Veraneio Hampel, São Francisco de Paula

October 4, Day 10: Hampel to Pôrto Alegre, Flight to Rio de Janeiro, and Drive to Itatiaia National Park. We should have a couple of hours of early birding on the Hampel grounds to search for anything we might have missed, or simply to enjoy repeat looks at many of the special resident birds. Afterwards, we'll drive to Pôrto Alegre in time for the 12:47 p.m. departure of TAM Flight 3410 to Rio de Janeiro (flight subject to change).

From Rio, we'll have a 3-hour drive to Itatiaia National Park and the lovely Hotel do Ypé, our base for the next four days.

NIGHT: Hotel do Ypé, Itatiaia

October 5–7, Days 11–13: Itatiaia National Park. It's no accident that we've chosen to end this tour at Itatiaia, for there is no more delightful place in southeast Brazil to bird. Three full days here allow us to thoroughly explore its avian riches and to savor the scenic beauty and pleasant climate. A combination of roads and trails will enable us to cover various elevational levels of the park, each with its own special birds. On one day we'll ascend to the high paramo-like grasslands in search of the Plovercrest (a spectacular little hummer with a "punk-rocker" crest), Velvety Black-Tyrant, and the endemic Itatiaia Thistletail. Most of our time will be spent farther down in the lovely, bamboo-rich forest. The list of special birds here is long, and should begin with the spectacular Black-and-gold Cotinga. Other possibilities include Tawny-browed Owl; Rufous-capped Motmot; Saffron Toucanet; Yellow-browed Woodpecker; Buff-fronted, White-browed, and Buff-browed foliage-gleaners; Rufous-breasted Leaf-tosser; Large-tailed, Tufted, White-bearded and Giant antshrikes; Spot-breasted and Rufous-backed antvireos; Star-throated Antwren; Rufous-tailed and Ochre-rumped antbirds; White-shouldered Fire-eye; Cryptic Anthrush; Speckle-breasted Antpitta; Rufous Gnateater; Slaty Bristlefront; Mouse-colored Tapaculo; Fork-tailed Tody-Tyrant, Shear-tailed Gray-Tyrant; Rufous-tailed Attila; Serra do Mar Tyrannulet; Olivaceous Elaenia; Brassy-breasted Tanager; Bay-chested Warbling-Finch; and many more.

One or more visits to the marshes, second-growth woodlands, and lowland forest below the park boundaries should repay us with a number of special birds, among them, Swallow-tailed Hummingbird, Sapphire-spangled Emerald, Planalto Hermit, Orange-eyed Thornbird, Orange-breasted Thornbird, Streamer-tailed Tyrant, Hangnest Tody-Tyrant, White-rumped Monjita, Long-billed Wren, and Brazilian Tanager.

Even the grounds of our charming hotel are exceptionally productive for birds and nearby hummingbird feeders can produce a nearly non-stop show. Photographers will enjoy the opportunity to train their cameras at leisure on such jewels as Black Jacobin, Violet-capped Woodnymph, and Brazilian Ruby.

NIGHTS: Hotel do Ypé, Itatiaia

October 8–9, Days 14–15: Itatiaia to Rio for Connections Home, or Begin Southeastern Brazil Part II. After a final morning of birding in Itatiaia, we'll drive to Rio de Janeiro in time for those continuing on our Southeastern Brazil Part II: Espírito Santo's Montane & Lowland Endemics tour (October 7-17, 2010) to catch the 3:22 p.m. departure of TAM Flight 3410 to Vitoria (subject to change). Those not continuing on this tour will be able to take an overnight flight to the USA, which will arrive in the morning on October 9 in time for homeward connections.

TOUR LEADERS: Kevin Zimmer & Andrew Whittaker

Kevin Zimmer has authored three books and numerous papers dealing with field identification and bird-finding in North America. His book, *Birding in the American West: A Handbook*, deals with finding and identifying birds in the western United States. Living in Alaska contributed to his affection for the Far North, where he has anchored VENT's tour program since 1986. For the past 20 years he has concentrated his attention on the Neotropics, particularly on Brazil, Costa Rica, Panama, Peru, and Venezuela. He has directed VENT's Brazil program since 1991. Kevin has a PhD in biology (research emphasis in Avian Evolutionary Ecology) from New Mexico State University, and is currently a field associate of Cornell's Laboratory of Ornithology and a Research Associate of the Los Angeles County Museum of Natural History. He has authored numerous technical papers on the taxonomy, distribution, and behavior of Neotropical birds, particularly those of the Amazon basin. In 2003 he completed (with co-author Mort Isler) the major chapter on the *Thamnophilidae* (antbirds) for the prestigious *Handbook of Birds of the World* series. In 2006, he and Curtis Marantz coauthored a six-CD compilation of *Bird Voices of Alta Floresta and Southeastern Amazonian Brazil* (produced by the Cornell Laboratory of Ornithology's Macaulay Library of Natural Sounds) that represents the most comprehensive set of commercially available bird recordings for any part of the Amazon Basin. He and Andrew Whittaker are currently at work on a comprehensive field guide to the birds of Brazil, to be published by

Princeton University Press. Kevin lives in Atascadero, California with his wife Susan. Their daughter Marina completed her master's degree in psychology at Dominican University in May 2008. Recently married, she and her husband are now living in Napa, California.

Andrew Whittaker's passion for birding and natural history started at the early age of seven in the UK. Since 1982 Andy has worked with birds, traveling around the world studying bird migration in Canada, Israel, Borneo, and the UK. He has been based in Amazonian Brazil for the last 22 years. Working in the Brazilian rainforest for the Smithsonian Institution has made Andy an authority on Amazonian birds and the region's natural history, and he has authored many technical publications on the region. He was a consultant for the prestigious *Life of Birds* series by David Attenborough, and is a research associate of the Museum Goeldi, in Belém. At present Andy is working with Kevin Zimmer on a comprehensive field guide to the birds of Brazil. Andy has extensive tour-leading experience, having led VENT tours throughout South and Central American countries, the UK, and the Antarctic. He immensely enjoys sharing his fascination and knowledge of Neotropical birds, animals, and their conservation with others. Andy's special interest is bird vocalizations; his knowledge of Neotropical voices has enabled him to make several important ornithological discoveries and add 18 species to the Brazilian list. Andy is a member of the Brazilian Ornithological Committee, and lives in Manaus with his wife Nadime, their son Steven, and daughters, Luana and Suzana.

TOUR SIZE: Each section will be limited to 14 participants.

FINANCIAL ARRANGEMENTS: The fee for Southeastern Brazil Part I (main tour) is **\$5795** per person in double occupancy from Curitiba (tour ends in Rio de Janeiro). The price includes all food from lunch on Day 2 to lunch on Day 14, all lodging as described in this itinerary, ground transportation during the tour, all park entrance fees, and guide services provided by the tour leaders. It does not include the flights between your home and Brazil, internal Brazilian flights (see "AIR INFORMATION" below), airport departure taxes, alcoholic beverages, special gratuities, phone calls, laundry, or items of a personal nature. Rates are based upon group tariffs; if the tour does not have sufficient registration, a small party supplement may be charged.

The single supplement for Southeastern Brazil Part I (main tour) is **\$405**. You will be charged a single supplement if you desire single accommodations, or if you prefer to share but have no roommate and we cannot provide one for you.

The fee for Southeastern Brazil Part I: Iguazu Falls Pre-Trip is **\$2295** per person in double occupancy from Iguazu Falls. The price includes all food from dinner on Day 2 to dinner on Day 4, all lodging as described in this itinerary, ground transportation during the tour, all park entrance fees, and guide services provided by the tour leaders. It does not include the flights between your home and Brazil, internal Brazilian flights (see "AIR INFORMATION" below), airport departure taxes, alcoholic beverages, special gratuities, phone calls, laundry, or items of a personal nature. Rates are based upon group tariffs; if the tour does not have sufficient registration, a small party supplement may be charged.

The single supplement for Southeastern Brazil Part I: Iguazu Falls Pre-Trip is **\$425**. You will be charged a single supplement if you desire single accommodations, or if you prefer to share but have no roommate and we cannot provide one for you.

TOUR REGISTRATION: To register for this tour, please contact the VENT office. The deposit for this tour is **\$500** per person per tour. If you prefer to pay your deposit by check, your tour space will be held for 10 days to allow time for the VENT office to receive your deposit and completed registration form. If you prefer to pay your deposit using a credit card, your deposit must be made with MasterCard or Visa at the time of registration. The VENT registration form should then be completed, signed, and returned to the VENT office. Full payment of the tour fee is due 120 days prior to the tour departure date.

EXCHANGE RATE SURCHARGES: In the erratic global financial markets of today, it is difficult to predict foreign currency exchange rates over the long term or at the time of operation of a tour or cruise departure. Tour

prices are based upon the rate of exchange at the time of itinerary publication. If exchange rates change drastically, it may be necessary to implement a surcharge. If a surcharge is necessary, every effort will be made to minimize the amount. In many cases, these additional foreign exchange rate surcharges are passed to VENT by its vendors and suppliers.

CANCELLATION POLICY: Cancellation penalties and refunds are based on the following schedule: if cancellation is made 120 days or more before the tour departure date, a cancellation fee of **\$250** per person will be charged unless the deposit is transferred to a new registration for another VENT tour that will operate within the next 12 months, in which case the cancellation fee will be **\$100** per person. If cancellation is made fewer than 120 days before departure date, no refund is available. This policy and fee schedule also applies to pre-trip and post-trip extensions. *We strongly recommend the purchase of trip cancellation insurance for your protection.*

<u>If you cancel:</u>	<u>Your refund will be:</u>
120 days or more before departure date	Your deposit minus \$250*
Fewer than 120 days before departure date	No refund available

*Unless the deposit is transferred to a new registration for another VENT tour that will operate within the next 12 months, in which case the cancellation fee will be \$100 per person.

FUEL AND FUEL SURCHARGES: In the uncertain, often volatile oil market of late, it is difficult – if not impossible – to predict fuel costs over the long term, and more specifically, at the time of operation of this departure. Our prices are based upon the prevailing fuel rates at the time of itinerary publication. While we will do everything possible to maintain our prices, if the fuel rates increase significantly, it may be necessary to institute a fuel surcharge.

TRIP CANCELLATION & MEDICAL EVACUATION INSURANCE: A brochure and application form for optional coverage for baggage, illness, and trip cancellation can be obtained through the VENT office. **We strongly recommend that you purchase trip cancellation insurance as soon as possible to protect yourself against losses due to accidents or illness. VENT recommends Travel Insured International as our preferred insurance provider.** Check with your insurance agent regarding coverage you may presently have via other insurance policies that may cover illness during your trip. **Waiver for pre-existing conditions is available; however, stipulations apply, usually requiring the purchase of the insurance soon after registering.** Optional expanded insurance coverage is available and includes items such as work-related cancellation, medical upgrade, and a “Cancel for Any Reason” clause among others. **Contact Travel Insured International prior to registration for details.** Not all insurance providers provide the same levels of coverage. If you purchase insurance through a company other than Travel Insured International, please be advised that rules and stipulations may be different.

IMPORTANT NOTE: Please read your itinerary carefully to see whether or not your tour/cruise requires MANDATORY Medical Insurance which covers you for emergency evacuation/repatriation during the trip. This coverage is included in the Worldwide Trip Protector plan offered by Travel Insured International. If you do not choose to purchase the insurance through Travel Insured International, you will need to do so through another insurance provider. A good website for information and acquisition of emergency evacuation/repatriation insurance is: www.insuremytrip.com.

Victor Emanuel Nature Tours is not a participant in the California Travel Consumer Restitution Fund. California law requires certain sellers of travel to have a trust account or bond. This business has a bond issued by Travelers in the amount of \$50,000. CST #2014998-50.

AIR INFORMATION: Victor Emanuel Travel is a full-service travel agency and wholly owned subsidiary of Victor Emanuel Nature Tours (VENT). Victor Emanuel Travel will be happy to make any domestic or

international air travel arrangements from your home and return. Please feel free to call the VENT office to confirm your air arrangements.

Note that there are several specific internal commercial Brazilian flights associated with this tour, the cost of which is not covered by the tour fee. Due to the complicated nature and limited availability of these flights, you are strongly encouraged to confirm reservations with Victor Emanuel Travel as early as possible.

CLOTHING AND CLIMATE: Weather will be generally mild, but mornings in the mountains and in Rio Grande do Sul can be chilly. Occasionally it can be hot at Iguaçu. Temperatures generally vary from lows in the 50s (occasionally the high 40s) to highs commonly in the 70s–80s, and sometimes in the 90s. **However, nights and early mornings in the São Francisco de Paula region are occasionally much cooler, and on one occasion we even awoke to a light frost!** Light field clothing (drab colors such as olive or khaki preferred), including several pairs of pants and shorts and comfortable shirts, will be appropriate, but you should also pack a warm sweater and/or jacket. A hat, sunglasses, and sunscreen are also recommended for protection. Be sure to have a pair of good hiking boots or comfortable walking shoes and a second pair to change into. A swim suit is also suggested (there are swimming pools at the hotels in Iguaçu and Itatiaia) and raingear is recommended. We usually encounter rain on at least a few days of the trip. Dress will be casual throughout. Rubber boots for possibly muddy trails are recommended. Also, a pocket umbrella is a good idea. There are three laundry stops on the main tour: Tulip Inn (Curitiba), Veraneio Hampel (São Francisco de Paula), and Hotel do Ypé (Itatiaia). For participants on the Iguaçu Falls Pre-Trip, laundry service is also available at the Hotel das Cataratas.

DIFFICULTY: **The two days at Iguaçu (Pre-Trip only), the mornings out of Curitiba and Itapoá, one morning at São Francisco de Paula, and all three days at Itatiaia involve walking trails/roads all morning. These are mostly level and easy walking, but do involve being on foot for several hours.**

On most mornings, we will try to be in the field at, or close to dawn. This is the time when tropical birds are most active and most vocal. Many of the more elusive species are unlikely to be seen unless we first hear them, and this requires early starts. On a few days (particularly our day on the Agulhas Negras Road in Itatiaia National Park), we must drive for some distance from our hotel to reach the birding areas. To arrive at these locations at dawn will require departures in the neighborhood of 4:00 a.m. At Iguaçu, we typically do our owling excursions pre-dawn, which will also involve departure times before 5:00 a.m. Other days will involve more civilized (although still early) starting times. Many non-travel days will involve a full morning of birding, followed by lunch and a mid-afternoon break of a couple of hours, during which participants may rest. These hours are quite often unproductive times for birding, and allow you to “recharge your batteries” prior to going out again in the latter part of the afternoon. On the long days at Iguaçu, afternoon birding is optional, and those that wish to return early to the hotel for rest or to spend more time at the falls, may do so. This is not an option on the Agulhas Negras Road, where the distance from the hotel precludes an early return for less than the full group. It should be emphasized that our bus/van (outfitted with snacks and a variety of cold drinks) will be with us at all times on those particular days, and participants wishing to rest on the bus may do so at any time.

Our bus or van will always be outfitted with an ice chest with bottled water and a variety of soft drinks. In many areas we will also have snacks available, and this will certainly be the case on full days afield when we are also planning on a picnic lunch. In other areas, it may be difficult to provide snacks. Many participants have found it useful on those days to pack snacks for mid-morning from the extensive breakfast buffets that are standard at virtually all of our hotels and lodges. These typically include fruit, luncheon meats, cheeses, and various types of cakes and breads.

DOCUMENTS: A current U.S. passport and **VISA** are required to enter Brazil. Your visa must be obtained in the U.S. prior to departure and is issued by Brazilian consulates. For further information, you may wish to contact the Brazil consulate nearest you or Pinnacle Travel Document Systems (www.traveldocs.com on the web or 888-838-4867 by phone), a company which handles visa procurement.

HEALTH PRECAUTIONS: Yellow fever vaccination is highly recommended, as well as polio and tetanus. Malaria has been confirmed in Brazil, including the chloroquine-resistant strain, but is highly unlikely on this tour. We suggest that participants consult their physician as well as the Centers for Disease Control and Prevention for current recommendations before beginning a prophylaxis regimen.

There have been some recent changes in recommendations for malaria prophylaxis. Mefloquine (Lariam) is now the drug of choice in all areas where chloroquine-resistant malaria is present. A single dose should be taken one week before the start of the tour, continued during the tour, and for four weeks after its conclusion. Mefloquine is available by prescription only and may not be suitable for those using cardio-vascular medication; consult your physician. Cholera has been reported in Brazil, but no country requires cholera vaccination for direct travel from the USA and no vaccinations are required to return to the USA. Please consult your physician for any recommended preventative treatment.

If you are taking prescription medication or over-the-counter medicine, be sure to bring an ample supply that will allow you to get through the tour safely. Please consult your physician as necessary. Remember to pack all medication in your carry-on baggage, preferably in original containers or packaging. As airline baggage restrictions can change without warning, please check with your airline for procedures for packing medication.

As standard travel precautions, you should always be up to date with tetanus shots, and strongly consider inoculations against Hepatitis types A and B.

In addition to your physician, a good source of general health information for travelers is the United States Centers for Disease Control and Prevention (CDC) in Atlanta. The CDC operates a 24-hour recorded Travelers' Information Line 877-FYI-TRIP (394-8747) or you can check their website at www.cdc.gov/travel. Canadian citizens should check the website of the Public Health Agency of Canada: www.phac-aspc.gc.ca/new_e.html (click on travel health).

INSECT PROTECTION: The use of a repellent containing DEET is recommended. We suggest bringing two squeeze bottles of Cutter's or some similar repellent.

BAGGAGE: We request that tour participants limit their baggage to one suitcase and one carry-on bag if possible, as some of the vehicles have very limited luggage space. As a precaution, we recommend packing a change of clothes, your binoculars, toiletries, travel documents, and walking shoes in your carry-on.

ITEMS TO BRING: Pack a flashlight or headlamp, water bottle or small canteen, alarm clock, and day pack. Your leaders will have a spotting scope, but if you have one and wish to bring it, please feel free to do so. **A supply of resealable plastic storage bags can be very handy for storing food items from the breakfast buffets, to be used as mid-morning snacks on the trails.**

MISCELLANEOUS:

Country Telephone Code: 55

Currency: Real

Electric Current: 110 Volts in Rio, Sao Paulo, Brasilia, Belo Horizonte, Belém, Manaus, but 220 in many other locales.

IMPORTANT NUMBERS AND WEB SITES TO KNOW:

Health: Centers for Disease Control and Prevention 877-FYI-TRIP or www.cdc.gov/travel

Weather: 900-WEATHER (a toll call) or www.weather.com

Travel Advisories: 202/647-5225 or www.travel.state.gov/

SUGGESTED READING: Our website at www.ventbird.com offers an affiliated online store which carries a wide variety of items for birding and nature lovers including over 6,000 books. A portion of the sales from the store benefits the Cornell Lab of Ornithology. You might also want to visit such other online stores as www.amazon.com, and for those out-of-print and hard-to-find titles, www.abebooks.com.

Birds

- Erize, Francisco, Jorge Rodriguez Mata, and Maurice Rumboll. *Birds of South America, Non-Passerines: Rheas to Woodpeckers*. 2007. Princeton University Press, Princeton, New Jersey, USA. Generally good illustrations and useful written descriptions of the non-passerine birds of South America. A good complement to the two volumes by Ridgely and Tudor listed below.
- Hilty, Steven L. *Birds of Tropical America*. Shelburne, VT: Chapters Publishing Ltd., 1994. Subtitle: "A watcher's introduction to behavior, breeding and diversity." (Paperback April 1996.)
- Ridgely, Robert S., and Guy Tudor. *The Birds of South America, Volume I: The Oscine Passerines: Jays, Swallows, Wrens, Thrushes and Allies, Vireos, Wood-warblers, Tanagers, Icterids and Finches*. Austin: The University of Texas Press, 1989. Very useful reference, with range maps and illustrations of many species not previously illustrated. (<http://birds.cornell.edu>; select "Audio Guides")
- Ridgely, Robert S., and Guy Tudor. *The Birds of South America Volume II: The Suboscine Passerines: Ovenbirds and Woodcreepers, Antbirds, Gnateaters, and Tapaculos, Tyrant Flycatchers, Manakins and Cotingas*. Austin: The University of Texas Press, 1994. Very useful reference, with range maps and illustrations of many species not previously illustrated. (<http://birds.cornell.edu>; select "Audio Guides")
- Ridgely, Robert S., and Guy Tudor. *Field Guide to the Songbirds of South America: The Passerines*. Austin: University of Texas Press, 2009. This book condenses the text from the two previous references into a single volume with many additional illustrations (400+ species). It has more of a field guide format, and provides consistently excellent illustrations and text for the vast majority of Brazilian passerines. This plus the Erize, Mata & Rumboll guide to the Non-Passerines would give good coverage of the vast majority of Brazilian birds.
- Van Perlo, Ber. *A Field Guide to the Birds of Brazil*. Oxford University Press, 2009. This recently published guide has minimal text, and somewhat uneven quality of illustrations, but it is a significant improvement on all previous attempts at a Brazilian field guide, and does offer range maps, text and illustrations for virtually all of Brazil's birds in a single volume.

Butterflies

D'Abrera, Bernard. *Butterflies of South America*. Australia: Hill House, 1984. Good pocket guide, covers many genera, nice pictures.

Mammals

Emmons, Louise H. *Neotropical Rainforest Mammals*. Chicago: University of Chicago Press, 1997. Good pictures and excellent text. (An audio field guide CD also available from this author: see below.)

General Nature

- Caufield, C. *In the Rainforest*. Chicago: Random House, 1985.
- Forsyth, Adrian, Ken Miyata et al. *Tropical Nature*. Scribner, 1987. (paperback)
- Kricher, John. *A Neotropical Companion*. Princeton: Princeton University Press, 1999.
- Pierson, David L., and Les Belesky. *The Ecotravellers' Wildlife Guide Brazil Amazon and Pantanal*. Academic Press, 2001.
- Stap, Don. *Parrot without a Name: The Search for the Last Unknown Birds on Earth*. Austin: University of Texas Press, 1991. An account of field expeditions with Ted Parker and John O'Neill, among others.

Recording

Emmons, Louise H., Bret M. Whitney and David L. Ross. *Sounds of Neotropical Rainforest Mammals*. Cornell Laboratory of Ornithology. (http://www.birds.cornell.edu/lab_cds.html)

TIPPING: As noted in our itineraries, tipping (restaurants, porters, drivers, and local guides) is included on VENT tours. However, if you feel one or both of your VENT leaders or any local guides have given you exceptional service, it is entirely appropriate tip. We emphasize that such tips are not expected and are entirely optional.

RESPONSIBILITY: Victor Emanuel Nature Tours, Inc. (VENT) and/or their Agents act only as agents for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, or airplane and assume no liability for injury, damage, loss, accident, delay, or irregularity which may be occasioned either by reason of defect in any vehicle or for any reason whatsoever, or through the acts or default of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. VENT and its Agents can accept no responsibility for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. All such losses or expenses will have to be borne by the passenger as tour rates provide for arrangements only for the time stated. The right is reserved to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. The right is reserved to cancel any tour prior to departure, in which case full refund will constitute full settlement to the passenger. The right is reserved to substitute leaders on any tour. When this is necessary, notification will be given to tour members. No refund will be made for any unused portion of the tour unless arrangements are made in sufficient time to avoid penalties. The prices of the tours are based on tariffs and exchange rates in effect on March 16, 2010 and are subject to adjustment in the event of any change therein. The right is reserved to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely. The airlines concerned and their agents and affiliates are not to be held responsible for any act, omission, or event during the time passengers are not on board their aircraft. The passenger ticket in use by said airlines, when issued, shall constitute the sole contract between the airlines and the purchaser of these tickets and/or passenger. The services of any I.A.T.A.N. carrier may be used for these tours, and transportation within the United States may be provided by any member carrier of the Airline Reporting Corporation.
