

# ECUADOR: AMAZONIA AT NAPO WILDLIFE CENTER

JULY 9-17, 2008

©2007

*From the lush Amazonian rainforests to the high Andean paramos, Ecuador is indeed a special place, boasting good access to birding habitat, unsurpassed scenic splendor, friendly people, and a stable government. Incredibly, over 1500 species of birds have been recorded in the country, in an area smaller than the state of Colorado! Among them are many of the most spectacular and distinctive Neotropical species. Ecuador: Amazonia at Napo Wildlife Center is the first of a two-part tour designed to sample this magnificent avifauna at two choice locations, representing very different regions. Between them they offer a full range of birding possibilities.*

*The exciting and very comfortable new Napo Wildlife Center in the Río Napo lowlands of northeastern Ecuador, lies within the most diverse avifaunal zone in the world, the vast rainforests of upper Amazonia. Located within the huge Yasuni National Park, at one million hectares the largest in Ecuador, it is a model in sustainable development, born out of the cooperation between the local indigenous community of Añangu and the EcoEcuador Foundation. The “Laguna de Añangu” is one of the very few pristine areas remaining in the Napo River drainage, thanks to the care of this small, environmentally conscious community that is the custodian of some 25,000 hectares (that’s 100 sq. miles)! Over the years, a lot of pressure has been exerted on this community to open up this marvelous area to oil exploitation. The Añangu have stood fast against this tide to achieve their ultimate dream—to build and run their own jungle lodge. Their vision is one of a healthy environment, one that will support their traditional way of life, while at the same time keeping them connected to a constantly more globalized world through sustainable management and use of its megadiversity. With economic and technical support from the Tropical Nature Conservation System, every member of the village has been involved in the planning and construction of this new lodge. Hunting was discontinued years ago by unanimous decision and the local school has been preparing its students with comprehensive courses in conservation, ecology and ecotourism.*

*The lowland rainforests of Amazonia, superficially so uniform in appearance, are marvelously complex in reality. They are home to the most diverse avifauna in the world, a web of species inhabiting every imaginable niche, and nearly 600 species of birds have been recorded at the Napo Wildlife Center in a short time. Almost the full array of lowland birds is present, including large raptors, guans and macaws. Antbirds are numerous and diverse, and mixed-flocks of a great variety of birds regularly forage through the understory and canopy here. Clay licks along the Napo and inside the forest attract large numbers of parrots, and blackwater swamps and river islands add yet another dimension to birding here. Two sturdy towers provide great opportunities for viewing the forest canopy and its special inhabitants. Of course, part of the allure of the rainforest lies in the fact that one never knows what might appear. Seeing birds in this environment is not always easy and will un-*

*doubtedly challenge us, but we will surely experience many wonderful surprises here at the Napo Wildlife Center.*

*This tour, in combination with “Ecuador: The Southern Andes” (July 16-27, 2008), has been planned to show you a wide array of birds, but a few words of caution are prudent. In our many years of birding the tropics we have found that it is extremely important to get out early while the birds are singing and more active. Most days we will be up early, and some days we will be afield all day. Much of our travel and birding in the lowlands will be from boats. Here we can also expect heat and humidity, while some rain is possible on both trips (which, of course, are why these forests are so incomparably lush). Accommodations are more than adequate, but are of necessity relatively simple. This trip has been planned to show you some of the best of Ecuador, but may be too strenuous for those not in good health or not wishing to spend a good portion of their time in the field.*

**July 9, Day 1: Miami to Quito.** Participants are encouraged to fly to Quito on either American Airlines from Miami or Continental Airlines from Houston, which are both scheduled to arrive in the evening. Upon arrival, you will be met at the airport and transferred to our hotel. Please note that your departure on Day 2 is fairly early. If you feel you need time to acclimate to the time zone and altitude, you may want to arrive a day early.

NIGHT: Hotel Sebastian, Quito

**July 10, Day 2: To Napo Wildlife Center.** After breakfast, we’ll transfer to the airport for our flight over the eastern cordillera of the Andes to the town of Francisco de Orellana, better known as Coca. From here we will take a short drive in a “chiva,” or open air bus, to the local port on the north bank of the Río Napo. Here we’ll board our covered dugout canoe (yes, complete with outboard motor), and journey downstream for about two and a half hours to the Napo Wildlife Center landing site. The birding along the river can be productive, but just watching the river as we slowly glide away from civilization is fascinating. Our local guides will meet us at the landing and we will travel by paddled canoe along the forested Añanguyacu stream to the lodge. Obviously, we’ll be birding and animal watching the entire way! Aside from many birds, this “introductory” ride also offers excellent chances for seeing primates. White-bellied Spider; Red Howler; Common Squirrel and Dusky Titi monkeys; Brown Capuchin and Golden-mantled Tamarin are among the possibilities. After settling into our rooms, we’ll receive a brief orientation to the workings and norms of the lodge and enjoy our welcome toast and dinner.

NIGHT: Napo Wildlife Center

**July 11-15, Days 3-7: Napo Wildlife Center.** Based in the comfort of these ecologically designed accommodations, we’ll spend six days exploring and experiencing this magnificent area. We will quietly paddle and float along in dugout canoes, exploring the lake edge and the densely enshrouded blackwater streams in search of parrots, trogons, kingfishers, jacamars, nunbirds, barbets, aracaris and toucans, woodpeckers, flycatchers, and much more. We’ll scout trails through low-lying várzea (seasonally-flooded) and upland terra firme (rich and well-drained) forest, our ears and eyes attentive to any sound or movement. We will be on the lookout for swarms of army ants with their attendant antbirds, and mixed foraging flocks in the midstory and canopy. Our local guides are incredibly keen and know the exact territories of many of the more skulking species and we’ll have excellent chances of seeing many of the most notoriously “difficult” species here. We will also make a trip out to the Napo River to visit a “saladero” where literally hundreds of parrots can be seen at close range from strategically built blinds. There will be some time to relax back at the lodge during midday breaks—believe it or not, you can bird from your very own hammock!

The species possibilities at the Napo Wildlife Center are too great to list here, but we will be in the realm of the richest avian diversity on earth, including tinamous; Zigzag and Agami herons; King and Greater Yellow-headed vultures; many raptors including the truly magnificent Harpy Eagle (we would be very lucky to see one,

but it is possible); guans and curassows; a wide array of parrots; Hoatzin; trogons; jacamars; a great variety of antbirds, manakins, cotingas, tanagers and more—well, it just goes on and on!! Well over 500 species of birds have been recorded here, and we will certainly find a lot of them.

NIGHTS: Napo Wildlife Center

**July 16, Day 8: Return to Quito.** This morning we'll leave the lodge early and work our way to the Río Napo by canoe, transferring to our covered dugout for the trip back to the airport at Coca. We should arrive back in Quito sometime in the early afternoon. You will have the rest of the afternoon on your own to explore Quito, relax, shop, or even catch up on your email at one of the nearby internet cafes.

NIGHT: Hotel Sebastian, Quito

**July 17, Day 9: Departure for Home or Begin Ecuador: The Southern Andes.** Participants not continuing on Ecuador: The Southern Andes (July 16-27, 2008) will be transferred to the Quito Airport in time for the morning departures of American Airlines at 8:00 a.m. to Miami or Continental Airlines at 7:40 a.m. to Houston.

**TOUR SIZE:** This tour will be limited to 14 participants.

**TOUR LEADER:** Paul Greenfield

**Paul Greenfield** grew up near New York City and became interested in birds as a child. He received his B.F.A. from Temple University where he was an art major at the Tyler School of Art. Since 1972, he has lived in Ecuador where his fascination for birds and art has culminated with the completion of 20 years of work illustrating *The Birds of Ecuador*, which he co-authored with Robert Ridgely. Paul is very involved in saving Ecuador's avian diversity and important habitats through his involvement with various foundations, as well as working with local government and communities to encourage their involvement in the protection of "their" biodiversity and the promotion of birding tourism in Ecuador. He has been showing visitors the birds of this fascinating country for over two decades and has led many Ecuador bird tours. He and his wife, Martha, live in Quito.

**FINANCIAL ARRANGEMENTS:** The fee for the tour is **\$3100** per person in double occupancy from Quito. This includes all meals from breakfast on Day 2 to dinner on Day 8, accommodations as stated in the itinerary, air charters and ground transportation during the tour, and guide services provided by the tour leaders. It does not include airfare from your home to Quito and return, airport departure taxes, alcoholic beverages, special gratuities, phone calls, laundry, or items of a personal nature. Rates are based upon group tariffs; if the tour does not have sufficient registration, a small-party supplement may have to be charged.

The single supplement for the tour is **\$455**. You will be charged a single supplement if you desire single accommodations, or if you prefer to share but have no roommate and we cannot provide one for you.

Those combining this tour with "Ecuador: The Southern Andes" (July 16-27, 2008) will receive a discount of \$100 per person in double occupancy and \$135 per person in single occupancy.

**TOUR REGISTRATION:** To register for this tour, please contact the VENT office. The deposit for this tour is **\$500** per person. If you prefer to pay your deposit by check, your tour space will be held for 10 days to allow time for the VENT office to receive your deposit and completed registration form. If you prefer to pay your deposit using a credit card, your deposit must be made with MasterCard or Visa at the time of registration. The VENT registration form should then be completed, signed, and returned to the VENT office. Full payment of the tour fee is due 120 days prior to the tour departure date.

**CANCELLATION POLICY:** Refunds are made according to the following schedule: if cancellation is made 120 days or more before the tour departure date, the deposit less \$125 per person is refundable. If cancellation is made fewer than 120 days before departure date, no refund is available. This policy and fee schedule also applies to pre-trip and post-trip extensions, as well as any transfers from one tour to another. ***We strongly recommend the purchase of trip cancellation insurance to protect yourself.***

<u>If you cancel:</u>	<u>Your refund will be:</u>
120 days or more before departure date	Your deposit minus \$125.
Fewer than 120 days before departure date	No refund available.

**TRIP CANCELLATION INSURANCE:** Application forms for optional coverage for baggage, illness, and trip cancellation can be obtained through the VENT office. We **strongly recommend** that you purchase trip cancellation insurance to protect yourself against losses due to accidents or illness. Check with your insurance agent regarding coverage you may presently have via other insurance policies that may cover illness during your trip. **Waiver for pre-existing conditions is available; however, stipulations apply, usually requiring the purchase of the insurance soon after registering. Contact the VENT office prior to registration for details.**

**Victor Emanuel Nature Tours is not a participant in the California Travel Consumer Restitution Fund. California law requires certain sellers of travel to have a trust account or bond. This business has a bond issued by Travelers in the amount of \$50,000. CST #2014998-50.**

**AIR INFORMATION:** Victor Emanuel Travel is a full-service travel agency and wholly owned subsidiary of Victor Emanuel Nature Tours (VENT). Victor Emanuel Travel will be happy to make any domestic or international air travel arrangements from your home and return. Please feel free to call the VENT office to confirm your air arrangements.

**BAGGAGE:** We suggest that you pack in two small duffelbags, or one duffel and one medium-sized suitcase, plus your carry-on bag. This is for two reasons: (1) **weight must be limited on the internal flights** to/from Coca to approximately 44 pounds per person; (2) if you are combining both tours, the two regions that we cover have rather different climates and while at Napo Wildlife Center, your bag for “Ecuador: Eastern Slope of the Andes” can be stored at our hotel in Quito. For the excursion to The Napo Wildlife Center, we suggest that you pack your clothing in plastic bags (i.e. ziplocks) as a precaution against rain or spray from the boats. (You do not need a “dry bag.”) As a precaution, please pack your travel documents, binoculars, medications, basic toiletries, and a change of clothes in your carry-on bag.

**CLIMATE:** The Napo Wildlife Center is in the tropical lowland Amazon rainforest at around 250 meters above sea level. Here you should be prepared for warm nights and warm to hot temperatures midday (the normal daily temperature range is the low 70s to low 90s). Humidity is always high, especially within the forest. We may also get caught in an occasional rain shower.

**CLOTHING:** Dress is casual or informal throughout. Lightweight field clothing is the norm for most areas visited. We suggest dark field pants and shirts for forest birding, and lightweight long-sleeved shirts that dry quickly (long sleeves are not essential, but offer additional protection from sun and biting insects). Please wear darker colors, not whites, and avoid startling patterns that frighten the birds. Also important are a hat and sunscreen for sun protection and rain jacket, poncho or umbrella. Good footwear is essential, and for this we strongly suggest sturdy mudboots or waterproof hiking boots. Napo Wildlife Center provides mudboots but the fit might not be perfect.

**Excellent laundry service is available at Napo Wildlife Center at a reasonable cost, greatly eliminating the need to bring lots of extra clothing.**

**CURRENCY:** The U.S. dollar is the currency in Ecuador. Cash is needed only for your personal expenses, such as bar bills, laundry, and souvenirs. It is strongly advised that most of your money be in U.S. traveler's checks, with a smaller amount of currency in U.S. Dollars. Mastercard, Visa, American Express, and Diner's Club are widely accepted in Quito but, as of this writing, are not accepted at Napo Wildlife Center.

**DOCUMENTS:** A passport valid for at least six months beyond your planned departure from Ecuador is required. Visas are not required for United States citizens. You will be issued a tourist card to be completed on board your flight to Quito. Non-U.S. citizens should check with their consulate/embassy for instructions.

**EQUIPMENT:** You will want to have sunhat, sunscreen, and sunglasses for protection from the sun; an umbrella and/or rain jacket; a belt pack or day pack for carrying your field equipment and water bottle; a small flashlight or headlamp; a washcloth or small hand towel; a water bottle; and an alarm clock. Consider bringing an extra pair of binoculars, a few between-meal snacks (such as trail mix, granola bars, dried fruit, nuts, etc), and Kleenex or handi-wipes. Annoying insects are possible in some areas, so you should bring repellent. We recommend Cutter's lotion (or a similar product) and a pump-style container of OFF (no aerosol cans). Topsy gel is useful for reducing irritation from bites and stings, as is cortisone cream. Your leaders will have a spotting scope; but if you wish to bring your own, that is fine. **Again, as a precaution**, it is a good idea to pack your binoculars, basic toiletry items, medications and travel documents, and a change of clothing in your carry-on bag.

**HEALTH:** Yellow fever vaccination is recommended, as well as polio and tetanus. Malaria is present in Ecuador, including the chloroquine-resistant strain and malaria prophylaxis is recommended. In addition to your physician, a good source of general health information for travelers is the U.S. Centers for Disease Control and Prevention (CDC) in Atlanta which operates a 24-hour recorded Travelers' Information Line (877) FYI-TRIP. You can check the CDC website at [www.cdc.gov/travel](http://www.cdc.gov/travel). Canadian citizens should check the website of the Public Health Agency of Canada: [www.phac-aspc.gc.ca/new\\_e.html](http://www.phac-aspc.gc.ca/new_e.html) (click on travel health).

As in most Latin American countries, we recommend drinking only bottled water and using no ice in beverages. Avoid milk products that have not been pasteurized, as well as unpeeled fruits and vegetables.

If you are taking prescription medication or over-the-counter medicine, be sure to bring an ample supply that will allow you to get through the tour safely. Please consult your physician as necessary. Remember to pack all medication in your carry-on baggage, preferably in original containers or packaging. As airline baggage restrictions can change without warning, please check with your airline for procedures for packing medication.

As standard travel precautions, you should always be up to date with tetanus shots, and strongly consider inoculations against Hepatitis types A and B.

**MISC:** Departure Tax - \$40 USD approximate  
Electricity - 110 volts AC, the same as the U.S.  
Language - Spanish, with Quechua or Indian dialects; some English.  
Time - Eastern Standard Time

**SUGGESTED READING:**

Our website at [www.ventbird.com](http://www.ventbird.com) offers an affiliated online store that carries a wide variety of items for birding and nature lovers, including over 6,000 books. A portion of the sales from the store benefits the Cornell Lab of Ornithology. You might also want to visit such other online stores as [www.amazon.com](http://www.amazon.com), and for those out-of-print and hard-to-find titles, [www.abebooks.com](http://www.abebooks.com), or [www.buteobooks.com](http://www.buteobooks.com), which specializes in ornithology books.

Emmons, Louise H. *Neotropical Rainforest Mammals: A Field Guide*. Chicago: The University of Chicago Press, 1990.

**TIPPING:** Tipping (restaurants, porters, and drivers) is included on VENT tours. However, if you feel that one or both of your VENT leaders, or any local guides and drivers, have given you exceptional service, it is entirely appropriate to tip. We emphasize that such tips are not expected and are entirely optional.

**RESPONSIBILITY:** Victor Emanuel Nature Tours, Inc. (VENT) and/or its Agents act only as agents for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, or airplane and assume no liability for injury, damage, loss, accident, delay, or irregularity which may be occasioned either by reason of defect in any vehicle or for any reason whatsoever, or through the acts or default of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. VENT and its agents can accept no responsibility for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. All such losses or expenses will have to be borne by the passenger, as tour rates provide for arrangements only for the time stated. The right is reserved to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. The right is reserved to cancel any tour prior to departure, in which case full refund will constitute full settlement to the passenger. The right is reserved to substitute leaders on any tour. When this is necessary, notification will be given to tour members. No refund will be made for any unused portion of the tour unless arrangements are made in sufficient time to avoid penalties. The prices of the tours are based on tariffs and exchange rates in effect on October 9, 2007 and are subject to adjustment in the event of any change therein. The right is reserved to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely. The airlines concerned and their agents and affiliates are not to be held responsible for any act, omission, or event during the time passengers are not on board their aircraft. The passenger ticket in use by said airlines, when issued, shall constitute the sole contract between the airlines and the purchaser of these tickets and/or passenger. The services of any I.A.T.A.N. carrier may be used for these tours, and transportation within the United States may be provided by any member carrier of the Airline Reporting Corporation.
